Career Objective

Detail-oriented AI & Data Science undergraduate with strong expertise in data analysis, machine learning, and data visualization. Skilled in Python, SQL, Power BI, and statistical modeling to transform raw data into actionable insights. Passionate about building intelligent systems and solving real-world problems using data-driven and AI-based approaches. Seeking opportunities in Data Science, Data Analytics, and AI/ML roles.

Education

Srinivas Institute of Technology

B.E in Artificial Intelligence and Data Science

2022 – 2026

CGPA: 8.44/10

Viveka PU College

Pre-University Course (PCMB)

2020 – 2022

80%

Govt HighSchool Brahmavara

SSLC / Class X

2018 – 2020

83.84%

Projects

DharaaAI—AI Powered Smart Agriculture Platform | *Python, Machine Learning, FastAPI, React.js, Supabase* **Dec 2025**

- Collected, cleaned, and preprocessed agricultural datasets (soil, weather, crop data) for machine learning pipelines.
- Performed feature engineering and exploratory data analysis (EDA) to improve model performance.
- Built and evaluated ML models (Decision Tree, Random Forest) using Scikit-learn for crop prediction.
- Designed backend APIs using FastAPI and managed structured data using PostgreSQL (Supabase).

Financial Analysis | *Python, Pandas, NumPy, Matplotlib*

Sep 2025

- Performed data cleaning, transformation, and preprocessing to ensure data quality and consistency.
- Conducted exploratory data analysis (EDA) to identify trends, correlations, and patterns in financial data.
- Applied data wrangling techniques to handle missing and inconsistent data.
- Generated visual reports and insights to support data-driven business decisions.

Customer Behavior Dashboard | *SQL, Python, Power BI, Pandas, Seaborn, Matplotlib*

Dec 2025

- Extracted and analyzed customer data using SQL and Python to identify purchasing behavior and sales trends.
- Performed data cleaning and exploratory data analysis (EDA) using Pandas to uncover customer segmentation insights.
- Developed an interactive Power BI dashboard to visualize KPIs such as revenue trends, product performance, and customer segments.
- Delivered data-driven insights to support marketing strategies and improve business decision-making.

Skills

Programming: Python, SQL, JavaScript

Data Analysis: Data Cleaning, Data Wrangling, EDA, ETL

Visualization: Power BI, Tableau, Matplotlib, Seaborn

Machine Learning: Regression, Classification, Decision Trees, Random Forest

Libraries: Pandas, NumPy, Scikit-learn

Databases: MySQL, PostgreSQL

Tools: Excel, Git, Jupyter Notebook

Core Concepts: Statistics, Probability, Linear Algebra

Soft Skills: Analytical Thinking, Problem Solving, Adaptability, Teamwork

Certifications

Deep Learning with TensorFlow, IBM (Sep 2025)

Machine Learning with Python, IBM (Sep 2025)

IT Specialist – Artificial Intelligence, Certiport (Dec 2024)

Deloitte Data Analytics Job Simulation, Forage (Mar 2026)

Achievements

- Presented a research paper titled "SmartAgro: An AI-Powered Advisory System for Crop Selection, Fertilizer Optimization, and Sustainable Farming" at the International Conference on Recent Innovations in Computer Science (ICRICS 2025).
- Published the paper in the JETIR (Journal of Emerging Technologies and Innovative Research) as part of the conference proceedings.
- Participated in national-level workshops, hackathons, and contributed to open-source projects, collaborating on real-world tech solutions and Volunteered in NSS activities.
